Warning/Caution/Note Definition

The words WARNING, CAUTION, and NOTE carry special meanings and should be carefully reviewed.

**WARNING**

Alerts the reader about a situation which, if not avoided, could result in death or serious injury. It may also describe potential serious adverse reactions and safety hazards.

**CAUTION**

Alerts the reader of a potentially hazardous situation which, if not avoided, may result in minor or moderate injury to the user or patient or damage to the product or other property. This includes special care necessary for the safe and effective use of the device and the care necessary to avoid damage to a device that may occur as a result of use or misuse.

**Note** - Provides special information to make maintenance easier or important instructions clearer.

Summary of safety precautions

Always follow the warnings and cautions listed on this page. Service only by qualified personnel.

**WARNING**

- Always allow the product to reach room temperature before you set up the product or test functional operations. Permanent product damage may occur.
- Always operate the product when all operators are clear of the mechanisms.
- Always apply the brakes when a patient is getting on the product or off the product or when the product is not moving. Injury could result if the product moves while a patient is getting on the product or off the product.
- Always put the product in the lowest position with the siderails up and latched when you leave a patient unattended on the product. Do not leave the product at a higher height.
- Always remove any devices that may be in the way before you raise or lower the litter.
- Do not sit on the end of the product. The product may tip.
- Always keep patient and operator extremities away from siderail spindles when you raise or lower the siderail.
- Always position the patient in the center of the product.
- Always lock the siderails in the full up position with the sleep surface flat in the lowest position when you transport a patient.
- Always keep the patient's limbs away from the siderail spindles when you lower the siderail.
- Do not allow the siderails to lower on their own.
- Always keep hands and fingers clear of the Fowler release handles and the Fowler frame when you lower the Fowler backrest.
- Always use caution when you raise a pneumatic Fowler while a patient is on the product. Use proper lifting techniques and get assistance, if necessary.
- Always support the patient’s head when you position the headpiece or the Fowler backrest. Patient injury may occur.
- Do not reach between the side of the head extension and the articulating headpiece to pull the release handles. Operator injury may occur.
- Always keep fingers away from jointed areas when you adjust the headpiece. Operator injury may occur.
- Always apply the brakes on both the product with the patient and the product the patient will be transferred to before you transfer a patient from one patient support platform (bed, stretcher, gurney, operating table) to another patient support platform.
- Always make sure that the patient support platforms are the same height before you transfer a patient.
- Always make sure that the transfer board is secure on both patient support platforms.
- Do not place items that weigh more than 30 lb (14 kg) on the defibrillator tray. Always strap down all devices that you place on the defibrillator tray.
- Always use caution if the defibrillator tray/foot extender, footboard/chart holder, or upright oxygen bottle holder is attached to avoid pinching your fingers when you position the foot end push handle option.
• Do not place items that weigh more than 30 lb (14 kg) on the defibrillator tray/foot extender. Always strap down all devices that you place on the defibrillator tray.
• Do not use the IV pole as a push/pull device. Product damage may occur.
• Do not place objects that exceed 40 lb (18 kg) in the upright oxygen bottle holder.
• Do not place objects that exceed 30 lb (14 kg) on the serving tray.
• Always use caution when you attach the restraint straps to avoid potential injury to both patients and operators. Physical restraints, even if properly secured, may result in serious harm to patients and operators, including entanglement, entrapment, physical injury, or death.
• Only attach restraint straps or devices at the identified attachment points of the product. Failure to do so may result in patient or operator injury. Do not attach restraints straps to the siderail.
• Always refer to the applicable state and federal restrictions and the appropriate facility protocols before you use any restraint strap or device.
• Do not clean, service, or perform maintenance while the product is in use.
• Do not immerse the mattress in cleaning or disinfectant solutions. Excess moisture could cause product malfunction that results in product damage or patient injury.
• Do not allow fluid to pool on the mattress. Fluids can cause corrosion of components and may cause the safety and performance of this product to become unpredictable.
• Always inspect mattress covers for tears, punctures, excessive wear, and misaligned zippers every time you clean the covers. Remove and replace a damaged mattress to prevent cross-contamination.
• Do not steam clean, pressure wash, hose off, or ultrasonically clean mattresses. These methods of cleaning may void the product’s warranty.
• Do not steam clean, hose off, or ultrasonically clean the product. Use of these methods of cleaning is not recommended and may void the product’s warranty.
• Always disinfect the mattress between patients. Failure to do so could result in cross-contamination and infection.

CAUTION
• Improper usage of the product can cause injury to the patient or operator. Operate the product only as described in this manual.
• Do not modify the product or any components of the product. Modifying the product can cause unpredictable operation resulting in injury to patient or operator. Modifying the product also voids its warranty.
• Do not use the hydraulics on the base to raise the product with a patient lift under the product.
• Do not place objects that exceed 60 lb (27 kg) in the base hood.
• Do not sit, step, or stand on the base hood.
• Always raise the IV pole before you attach the defibrillator tray/foot extender to the product. If you do not raise the IV pole, the foot extender will not operate.
Introduction

This manual assists you with the operation or maintenance of your Stryker product. Read this manual before operating or maintaining this product. Set methods and procedures to educate and train your staff on the safe operation or maintenance of this product.

CAUTION

• Improper usage of the product can cause injury to the patient or operator. Operate the product only as described in this manual.
• Do not modify the product or any components of the product. Modifying the product can cause unpredictable operation resulting in injury to patient or operator. Modifying the product also voids its warranty.

Note

• This manual is a permanent part of the product and should remain with the product even if the product is sold.
• Stryker continually seeks advancements in product design and quality. This manual contains the most current product information available at the time of printing. There may be minor discrepancies between your product and this manual. If you have any questions, contact Stryker Customer Service or Technical Support at 1-800-327-0770.

Product description

The Stryker Model 1089 Eye Surgery Stretcher is a wheeled stretcher that consists of a platform mounted on a wheeled frame and is designed to transport patients in a horizontal position within the interior of a healthcare facility. Intended operators include health professionals and trained representatives of the user facility. The device has a dual articulating, contoured or flat, head-piece to support the patient during procedures. The device has siderails, supports for fluid infusion equipment, and various options and accessories that assist with the support and position of the patient and transport of the patient.

Indications for use

The Eye Surgery Stretcher is a wheeled device that provides a method of transporting patients within a healthcare facility. The device has a dual-articulating headpiece and enhanced head end clearance for surgical access. The stretcher may be used for minor procedures and short-term stay, typical of existing stretcher applications, including outpatient clinical evaluation, treatment, minor procedures, and outpatient recovery.

The Eye Surgery Stretcher is intended for all use in all acute care hospitals and medical outpatient services. The product has a safe working load up to 500 lb (225 kg).

The Eye Surgery Stretcher is not intended to be used for long-term inpatient treatment and recovery.

Clinical benefits

Patient transport and facilitate treatment

Expected service life

The Stryker Model 1089 Eye Surgery Stretcher has a 10 year expected service life under normal use conditions and with appropriate periodic maintenance.

Disposal/recycle

Always follow the current local recommendations and/or regulations governing environmental protection and the risks associated with recycling or disposing of the equipment at the end of its useful life.
Contraindications

None known.

Contact information

Contact Stryker Customer Service or Technical Support at: 1-800-327-0770.

Stryker Medical
3800 E. Centre Avenue
Portage, MI 49002
USA

Note - The user and/or the patient should report any serious product-related incident to both the manufacturer and the Competent authority of the European Member State where the user and/or patient is established.

To view your operations or maintenance manual online, see https://techweb.stryker.com/.

Have the serial number (A) of your Stryker product available when calling Stryker Customer Service or Technical Support. Include the serial number in all written communication.

Serial number location

![Serial number location diagram]

Date of manufacture

The year of manufacture is the first four digits of the serial number.
Setup

To unpack your product, see the unpacking instructions that are attached to the product inside of the shipping crate.

**WARNING**

- Always allow the product to reach room temperature before you set up the product or test functional operations. Permanent product damage may occur.
- Always operate the product when all operators are clear of the mechanisms.

Make sure that the product is working before you put the product into service.

1. Press down on the brake pedal to apply the brakes. Make sure that all four casters are locked.
2. Raise and lower the litter.
3. Raise the product to the highest height. Put the product in the Trendelenburg position. Make sure that the head end lowers to the lowest position.
4. Raise the product to the highest height. Put the product in the Reverse Trendelenburg position. Make sure that the foot end lowers to the lowest position.
5. Apply the fifth wheel to make sure that the fifth wheel is guides and pivots the product.
6. Make sure that the siderails raise, lower, and lock in place.
7. Raise and lower the Fowler backrest (head end).
8. Rotate the headpiece in both directions to make sure that the headpiece adjusts to all positions.
Operation

Applying and releasing the brakes

**WARNING** - Always apply the brakes when a patient is getting on the product or off the product or when the product is not moving. Injury could result if the product moves while a patient is getting on the product or off the product.

To apply the brakes, push down on the brake (red) side of the brake/steer pedal. Push on the product to make sure that the brakes work.

To release the brakes, push down on the steer (green) side of the brake/steer pedal.

Raising or lowering the litter

**WARNING**

- Always put the product in the lowest position with the siderails up and latched when you leave a patient unattended on the product. Do not leave the product at a higher height.
- Always remove any devices that may be in the way before you raise or lower the litter.
- Do not sit on the end of the product. The product may tip.
- Always keep patient and operator extremities away from siderail spindles when you raise or lower the siderail.

To raise the litter, press down on the pump pedal (A) until you achieve the desired height (Figure 1).

To lower the entire litter, press on the center of the uni-lower pedal (C).

To lower the head end of the litter, press down on the foot end release pedal (D) or press on the side of the uni-lower pedal (C) closest to the head end of the product.

To lower the foot end of the litter, press down on the foot end release pedal (B) or press on the side of the uni-lower pedal (C) closest to the foot end of the product.
Positioning the product in Trendelenburg

**WARNING** - Always remove any devices that may be in the way before you raise or lower the litter.

**CAUTION** - Do not use the hydraulics on the base to raise the product with a patient lift under the product.

To position the product in the Trendelenburg position (head down), Raise the litter (*Raising or lowering the litter* (page 10)).

**Note** - Raise the litter to the highest height for a greater Trendelenburg angle.

To lower the head end of the product, press down on the foot end release pedal (D) or press down on the side of the uni-lower pedal (C) closest to the head end until the litter is flat (Figure 1).

To lower the product from Trendelenburg position, press down on the foot end release pedals (B and D) at the same time or press down on the center of the uni-lower pedal (C) until the litter is flat.

Positioning the product in Reverse Trendelenburg

**WARNING** - Always remove any devices that may be in the way before you raise or lower the litter.

**CAUTION** - Do not use the hydraulics on the base to raise the product with a patient lift under the product.

To position the product in the Reverse Trendelenburg position (foot down), raise the litter to the highest height (*Raising or lowering the litter* (page 10)).

To lower the foot end of the product, press down on the foot end release pedal (B) or press down on the side of the uni-lower pedal (C) to the foot end (Figure 1).
To lower the product from Reverse Trendelenburg position, press down on the foot end release pedals (B and D) at the same time or press down on the center of the uni-lower pedal (C) until the litter is flat.

**Translating a patient with the retractable fifth wheel**

**WARNING**

- Always position the patient in the center of the product.
- Always remove any devices that may be in the way before you raise or lower the litter.
- Always lock the siderails in the full up position with the sleep surface flat in the lowest position when you transport a patient.

**CAUTION** - Do not use the hydraulics on the base to raise the product with a patient lift under the product.

To transport a patient with the retractable fifth wheel:

1. Push down on the steer side of the brake/steer pedal to apply the fifth wheel.
2. Put the pedal in the neutral position to move the product laterally. Move the product to the desired location.
   
   **Note** - Do not attempt to move the product laterally with the retractable fifth wheel applied.
3. Apply the brakes to lock the product in place.
   
   **Note** - Always make sure that the brake is released before you move the product to avoid operator or patient injury.

**Raising or lowering the siderails**

**WARNING**

- Always put the product in the lowest position with the siderails up and latched when you leave a patient unattended on the product. Do not leave the product at a higher height.
- Always lock the siderails in the full up position with the sleep surface flat in the lowest position when you transport a patient.
- Always keep the patient’s limbs away from the siderail spindles when you lower the siderail.
- Do not allow the siderails to lower on their own.

To raise the siderails, use two hands to grasp the siderail. Raise the siderail until the release latch clicks into place. Pull on the siderail to make sure that the siderail is locked.

To lower the siderails, pull up on the release latch. Guide the siderail to the lowest position.

**Note** - Do not use siderails as restraint devices to keep the patient from exiting the product. The siderails keep the patient from rolling off the product. The operator must determine the degree of restraint necessary to make sure that the patient is safe.

**Raising or lowering the Fowler backrest**

**WARNING**

- Always keep hands and fingers clear of the Fowler release handles and the Fowler frame when you lower the Fowler backrest.
- Always use caution when you raise a pneumatic Fowler while a patient is on the product. Use proper lifting techniques and get assistance, if necessary.

To raise the Fowler backrest, squeeze the Fowler release handles (A) and pull the Fowler backrest up to the desired position (Figure 2).

To lower the Fowler backrest, squeeze the Fowler release handles (A) and push the Fowler backrest down to the desired position (Figure 2).
Raising or lowering the Fowler backrest or the Gatch with the crank option

To raise the Fowler backrest, turn the crank handle clockwise.

To lower the Fowler backrest, turn the crank handle counterclockwise.

To raise the Gatch, turn the crank handle clockwise.

To lower the Gatch, turn the crank handle counterclockwise.

Note - The Fowler backrest and Gatch crank handles are stored under the litter. Pivot the crank out and push in to secure the crank rod.

Positioning the enhanced clearance headpiece

WARNING

- Always support the patient’s head when you position the headpiece or the Fowler backrest. Patient injury may occur.
- Do not reach between the side of the head extension and the articulating headpiece to pull the release handles. Operator injury may occur.
- Always keep fingers away from jointed areas when you adjust the headpiece. Operator injury may occur.

To adjust the articulating headpiece:

1. Squeeze right handle (A) under the head section to release the latch. Rotate the headpiece on axis “A” (head) (Figure 3).
2. Squeeze left handle (B) under the head section to release the latch. Rotate the head section on axis “B” (neck).

   **Note** - For ease of use, release only one latch at a time.

### Storing objects in the base hood

**CAUTION**
- Do not place objects that exceed 60 lb (27 kg) in the base hood.
- Do not sit, step, or stand on the base hood.

You can store patient belongings in the base hood. Do not use the oxygen bottle holder cutout to store oxygen bottles or patient belongings.
## Accessories and parts

These accessories may be available for use with your product. Confirm availability for your configuration or region. Call Stryker Customer Service: 1-800-327-0770.

Transferring a patient with the patient transfer board

WARNING

- Always apply the brakes on both the product with the patient and the product the patient will be transferred to before you transfer a patient from one patient support platform (bed, stretcher, gurney, operating table) to another patient support platform.
- Always make sure that the patient support platforms are the same height before you transfer a patient.
- Always make sure that the transfer board is secure on both patient support platforms.

To transfer a patient with a patient transfer board:

1. Apply the brakes. Push on the product to make sure that the brakes work.
2. Lower the siderail (A) to the lowest position (Figure 4).
3. Raise the transfer board (C) from the bottom while you lift from the top.
   
   **Note** - The transfer board (C) is located between the siderail (A) and the mattress (B) (Figure 4).
4. Pivot the board downward onto the mating support surface.
5. Transfer the patient to the mating support surface.
Hanging devices from the surgery accessory rail

You can use the surgery accessory rail to hang devices such as pumps, Foley bags, or monitors on either side of the product.

Attaching the adjustable arm board

You can use the adjustable arm board to rest a patient’s arm during a minor procedure.

To attach the arm board:

1. Slide the direct clamp onto the surgery accessory rail.
2. Insert the bar-leg support into the hole in the top of the direct clamp.
3. Tighten the clamp to secure the arm board in place.
4. Rotate the arm board to the desired position and lock in place. Make sure that the arm board is secure before you place the patient’s arm on the arm board.
Installing and removing the pre-op-post-op head extension (crank Fowler backrest only)

1. To install the extension on the litter, slide the extension tube into the receptacle tube on the side of the Fowler frame. Pivot the extension upward until the extension locks in place on the headpiece frame.

2. To remove the extension from the litter, pull the red knob (A) under the extension toward you (Figure 5). Rotate the extension downward and pull the extension straight out of the socket.

   **Note**
   - The pre-op and post-op head extensions provide additional litter surface to protect the patient’s head during transport.
   - The head extension can be used as push handles when you move the product.

   ![Figure 5 – Red knob location](image)

**Positioning the wrist rest**

There are two optional wrist rests available:

- Standard (1)
- Temporal (2)

To position the wrist rest (Figure 6):

1. Insert the support tube (A) into the socket in the Fowler backrest head piece assembly.
2. Turn the knob (B) clockwise to secure the wrist rest assembly.
3. Turn the knob (C) counterclockwise to loosen it.
4. Raise or lower the wrist rest to the desired height.
5. Turn the knob clockwise to tighten the knob and hold the wrist rest in place.

   **Note** – The “U” shaped rest (D) can be pivoted up and away from the patient when the wrist rest is not in use.
Installing the drape support and air delivery system

The optional drape support air delivery system has a flexible drape support with air tubing inside the support for patient comfort.

1. Place the mounting tab (A) into the IV socket at the head end of the product.
2. Insert the air delivery tube into the air tube receptacle (B) (Figure 7).

   **Note** - The maximum PSI level for the drape support/oxygen tubing is 20 PSI (1.38 Bars/140 KPA).
Positioning or stowing the push handles (optional)

To position or stow the push handles:
1. Pivot the handles up from the end of the product (Figure 8).
2. Push down on the handles to lock them into position.
3. Reverse steps to stow the handles.

*Note* - Only use the push handles as push/pull devices unless otherwise specified to avoid product damage.

![Figure 7 – Air delivery tubing](image)

![Figure 8 – Positioning the head end push handles](image)

Attaching the defibrillator tray

**WARNING**

- Do not place items that weigh more than 30 lb (14 kg) on the defibrillator tray. Always strap down all devices that you place on the defibrillator tray.
- Always use caution if the defibrillator tray/foot extender, footboard/chart holder, or upright oxygen bottle holder is attached to avoid pinching your fingers when you position the foot end push handle option.

To attach the defibrillator tray:
1. Insert the defibrillator tray pins into the sockets at the foot end of the product.
2. Use the strap to secure devices to the defibrillator tray.
Note
- Do not use the defibrillator tray as a push/pull device. Product damage may occur.
- Always raise the foot end push handles when you use accessories (such as the defibrillator tray/foot extender, footboard/chart holder, upright oxygen bottle holder) or the accessories will not function.

Converting the defibrillator tray/foot extender to a defibrillator tray

WARNING
- Do not place items that weigh more than 30 lb (14 kg) on the defibrillator tray/foot extender. Always strap down all devices that you place on the defibrillator tray.
- Always use caution if the defibrillator tray/foot extender, footboard/chart holder, or upright oxygen bottle holder is attached to avoid pinching your fingers when you position the foot end push handle option.

CAUTION - Always raise the IV pole before you attach the defibrillator tray/foot extender to the product. If you do not raise the IV pole, the foot extender will not operate.

To convert the defibrillator tray/foot extender to a defibrillator tray:
1. Pull out the top knob (A) (Figure 9).
2. Pivot the defibrillator tray (B) until the tray is flat over the foot end of the product. Release the top knob (A). Make sure that the defibrillator tray is locked in place.
3. Use the strap to secure devices to the defibrillator tray.

Note
- Do not use the defibrillator tray/foot extender as a push/pull device. Product damage may occur.
- Do not attach items to the foot extender.

Figure 9 – Defibrillator tray/foot extender

Converting the defibrillator tray/foot extender to a foot extender

WARNING
- Do not place items that weigh more than 30 lb (14 kg) on the defibrillator tray/foot extender. Always strap down all devices that you place on the defibrillator tray.
- Always use caution if the defibrillator tray/foot extender, footboard/chart holder, or upright oxygen bottle holder is attached to avoid pinching your fingers when you position the foot end push handle option.
Always raise the IV pole before you attach the defibrillator tray/foot extender to the product. If you do not raise the IV pole, the foot extender will not operate.

To convert the defibrillator tray/foot extender to a foot extender (Figure 9):

1. Pull out the top knob (A).
2. Pivot the defibrillator tray (B) until the tray locks against the foot extender.
3. Pull out the bottom knob (D) while you hold the defibrillator tray/foot extender assembly.
4. Lower the foot extender (C) until the foot extender is flat.
5. Release the bottom knob (D). Push on the foot extender to make sure that the foot extender is locked in place.

Note
- Do not use the defibrillator tray/foot extender as a push/pull device. Product damage may occur.
- Do not attach items to the foot extender.

Attaching the footboard/chart holder

WARNING - Always use caution if the defibrillator tray/foot extender, footboard/chart holder, or upright oxygen bottle holder is attached to avoid pinching your fingers when you position the foot end push handle option.

To attach the footboard/chart holder, insert the footboard/chart holder pins into the sockets at the foot end of the product.

Note - Do not use the footboard/chart holder as a push/pull device. Product damage may occur.

Positioning the two-stage permanently attached IV pole option

WARNING - Do not use the IV pole as a push/pull device. Product damage may occur.

You can purchase the product with the two-stage IV pole option permanently attached at the head end, foot end, or both ends of the product. The IV pole is equipped with a telescopic pole that extends to provide a second height position. You can fold and store the IV pole when not in use.

To position the two-stage IV pole (Figure 10):

1. Lift and pivot the pole from the storage position.
2. Push the IV pole down until the IV pole locks in place.
3. To raise the height of the IV pole, pull up on the telescoping portion (A) until the pole locks in place at the fully raised position.
4. Rotate the IV hangers (B) to the desired position and hang the IV bags.
5. To lower the IV pole, hold the telescoping portion of the IV pole, turn the latch (C), and lower the telescoping portion.

Note
- Do not hang IV bags that exceed 40 lb (18 kg) on the IV pole.
- Always make sure that the IV pole is at a low height to pass safely through door openings when you transport a patient.
Positioning the three-stage permanently attached IV pole option

**WARNING** - Do not use the IV pole as a push/pull device. Product damage may occur.

You can purchase the product with the three-stage IV pole option permanently attached at the head end, foot end, or both ends of the product. The IV pole is equipped with a telescopic pole that extends to provide a second and third height position. You can also fold and store the IV pole when not in use.

To position the three-stage IV pole (Figure 11):

1. Lift and pivot the pole from the storage position.
2. Push the IV pole down until the pole locks in place.
3. To raise the height of the IV pole, pull up on the telescoping portion (A) until the pole locks into place at the fully raised position.
4. For a higher IV pole, pull up on section (B). Release section (B) at any desired height to lock the pole in place.
5. Rotate the IV hangers (C) to the desired position and hang the IV bags.
6. To lower the IV pole, push up on the yellow portion of the grip (D) while holding on to section (B) until the pole lowers.
7. Turn the latch (E) and lower the IV pole telescoping portion.

**Note**
- Do not hang IV bags that exceed 12 lb (5 kg) total for all bags on the IV pole.
- Do not hang IV bags that exceed 9.3 lb (4.2 kg) on a single IV hanger.
- Always make sure that the IV pole is at a low height to allow the pole to pass safely through door openings when you transport a patient.
Figure 11 – Positioning the three-stage permanently attached IV pole

Attaching and positioning the removable IV pole

**WARNING** - Do not use the IV pole as a push/pull device. Product damage may occur.

To attach and position the removable IV pole (Figure 12):
1. Insert the IV pole into a socket at the head end or foot end of the product.
2. Turn the knob (A) counterclockwise and pull up on the telescoping portion (B) until you reach the desired height.
3. Turn the knob (A) clockwise to lock the telescoping portion in place.

**Note**
- Do not hang IV bags that exceed 40 lb (18 kg) on the IV pole.
- Always make sure that the IV pole is at a low height to pass through door openings when you transport a patient.
Attaching the upright oxygen bottle holder

**WARNING**
- Do not place objects that exceed 40 lb (18 kg) in the upright oxygen bottle holder.
- Always use caution if the defibrillator tray/foot extender, footboard/chart holder, or upright oxygen bottle holder is attached to avoid pinching your fingers when you position the foot end push handle option.

The upright oxygen bottle holder supports an oxygen bottle in a vertical position.

To attach the upright oxygen bottle holder:
1. Insert the support bar into any of the IV sockets.
2. Insert the cotter pin through the hole in the support bar to secure the bottle holder to the product.

*Note* - Do not use the upright oxygen bottle holder as a push/pull device.

Extending or stowing the serving tray holder/footboard

**WARNING** - Do not place objects that exceed 30 lb (14 kg) on the serving tray.

To fit the serving tray on the siderail, pull out on both sides of the serving tray and position the tray over the siderails.

To stow the serving tray:
1. Remove the serving tray from the siderails.
2. Push in the sides of the serving tray.
3. Store the serving tray in the footboard.

*Note* - Do not use the serving tray/footboard as a push/pull device.
Attaching the siderail pads
To attach the siderail pads:
1. Tuck the siderail pad between the mattress and the siderail.
2. Fasten the Velcro® straps around the top of the siderail to secure the siderail pad.

Locating the patient restraint strap tie-ins

**WARNING**
- Always use caution when you attach the restraint straps to avoid potential injury to both patients and operators. Physical restraints, even if properly secured, may result in serious harm to patients and operators, including entanglement, entrapment, physical injury, or death.
- Only attach restraint straps or devices at the identified attachment points of the product. Failure to do so may result in patient or operator injury. Do not attach restraints straps to the siderail.
- Always refer to the applicable state and federal restrictions and the appropriate facility protocols before you use any restraint strap or device.

There are six patient restraint strap tie-in locations on the litter assembly for attaching patient restraint straps (Figure 13).

![Figure 13 – Restraint strap tie-in locations](image)
Cleaning and disinfecting with wipes

For United States only. Confirm availability for your configuration or region. Call Stryker Customer Service: 1-800-327-0770.

Stryker’s preferred wipes (2060-000-001 6” x 10” or 2060-000-002 9” x 12”) include the following active ingredients:

• n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chloride - 0.154%
• n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chloride - 0.154%
• Isopropanol - 21.000%

Non-active ingredient: Ethylene Glycol Monobutyl Ether – < 3%

**Note** - For safety information, read the product label.

To clean or disinfect the external product surface:

1. To clean, wipe external surfaces with a fresh, clean wipe to remove all visible soils. Repeat as necessary until the product is clean.

   **Note**
   • Use as many wipes as necessary.
   • Complete step 1 before you disinfect.

2. To disinfect, wipe external surfaces with a fresh, clean wipe until wet. Allow the external surface to remain wet for two minutes at room temperature.

3. Allow the product to dry before you return it to service.
Cleaning

Cleaning the product

**WARNING** - Do not clean, service, or perform maintenance while the product is in use.

Recommended cleaning method:
1. Follow the cleaning solution manufacturer’s dilution recommendations.
2. Hand wash all surfaces of the product with warm water and mild detergent.
3. Avoid over-saturation and make sure that the product does not stay wet longer than the detergent manufacturer’s guidelines for proper cleaning.
4. Dry thoroughly. Do not replace the mattress on the product until the product is dry.
5. Check functionality before you return the product to service.
   - Raise and lower the product
   - Lock and unlock the brake/steer pedal in both positions
   - Latch and unlatch the siderails
   - Raise and lower the Fowler backrest
   - Raise and lower the Gatch
   - Make sure all components have proper lubrication
   - Make sure all labels are intact

**Note**
- Some cleaning agents are corrosive in nature and may cause damage to the product if you use them improperly. If you do not properly rinse and dry the product, a corrosive residue may be left on the surface of the product that could cause premature corrosion of critical components. Failure to follow these cleaning instructions may void your warranty.
- Do not steam clean, power wash, hose off, or ultrasonically clean the product. Use of these methods of cleaning is not recommended and may void the product’s warranty.
- Clean the base hood.
- Clean the bottom of the brake pads to prevent wax or floor remnant buildup.

Cleaning the mattress

**WARNING**
- Do not clean, service, or perform maintenance while the product is in use.
- Do not immerse the mattress in cleaning or disinfectant solutions. Excess moisture could cause product malfunction that results in product damage or patient injury.
- Do not allow fluid to pool on the mattress. Fluids can cause corrosion of components and may cause the safety and performance of this product to become unpredictable.
- Always inspect mattress covers for tears, punctures, excessive wear, and misaligned zippers every time you clean the covers. Remove and replace a damaged mattress to prevent cross-contamination.
- Do not steam clean, pressure wash, hose off, or ultrasonically clean mattresses. These methods of cleaning may void the product’s warranty.

The life of the mattress can be affected by an increase in frequency of usage, which might include more frequent cleaning and disinfection.

Recommended cleaning method:
1. Use a clean, soft cloth to wipe down the entire mattress with a mild soap and water solution to remove foreign material.
2. Wipe down the mattress with a clean, dry cloth to remove any excess liquid or cleaning agents.

3. Rinse and dry covers after cleaning.

4. Disinfect as needed with a hospital grade disinfectant after cleaning has been completed (*Disinfecting the mattress* (page 30)).

   **Note**
   - Do not iron, dry-clean, or tumble dry the mattress, as this will cause malfunction and damage the product.
   - The mattress cover must be completely dry before you store, add linens, or place a patient on the mattress to prevent impairment of the product performance.
   - Avoid over-exposure to alcohol or hydrogen peroxide. The cover material will swell.
   - Do not allow liquid to seep into the zipper area and watershed cover barrier. Fluids allowed to come in contact with the zipper may leak into the mattress which could impair the product performance.
   - Some cleaning agents are corrosive in nature and may cause damage to the product if you use them improperly. If you do not rinse and dry the product well, a corrosive residue may be left on the surface of the product that could cause premature corrosion of critical components. Failure to follow these cleaning instructions may void your warranty.

### Remove iodine

1. Make a solution of 1 to 2 tablespoons of sodium thiosulfate in a pint of warm water. Use the solution to wipe down the stained area.

2. Clean the stain as soon as possible after the stain occurs.

3. If stains are not immediately removed, allow solution to soak or stand on the mattress before you wipe the mattress.

4. Rinse the mattresses which have been exposed to the solution with clear water before you return the mattresses to service.

   **Note** - Failure to follow these directions when you use these types of cleaners may void this product’s warranty.

### Special instructions

<table>
<thead>
<tr>
<th>Velcro®</th>
<th>Saturate with disinfectant, rinse with water, and allow the solution to evaporate.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solids or stains</td>
<td>Use neutral soaps and warm water. Do not use harsh cleansers, solvents, or abrasive cleaners.</td>
</tr>
<tr>
<td>Hard-to-clean spots</td>
<td>Use standard household cleansers or vinyl cleansers and a soft bristle brush on troublesome spots or stains. Pre-soak dried-on soil.</td>
</tr>

Disinfecting

Disinfecting the product

**WARNING**

- Do not clean, service, or perform maintenance while the product is in use.
- Do not steam clean, hose off, or ultrasonically clean the product. Use of these methods of cleaning is not recommended and may void the product’s warranty.

Recommended disinfectants:

- Quaternaries (active ingredient - ammonium chloride) that contain less than 3% glycol ether
- Phenolic disinfectant (active ingredient - o-phenylphenol)
- Chlorinated bleach solution (5.25% bleach diluted 1 part bleach to 100 parts water which equals 520 ppm available chlorine (40 mL of a 5.25% bleach solution per 4000 mL water))
- 70% isopropyl alcohol

Recommended disinfection method:

1. Follow the disinfectant solution manufacturer’s dilution recommendations.
2. Hand wash all surfaces of the product with a disinfectant solution.
3. Avoid over-saturation and make sure that the product does not stay wet longer than the chemical manufacturer’s guidelines for proper disinfecting.
4. Dry the product. Do not place the mattress on the product until the product is dry.
5. Disinfect the Velcro® after every use. Saturate the Velcro® with disinfectant, rinse with water, and allow the disinfectant to evaporate (appropriate disinfectant is determined by the facility).
6. Check functionality before you return the product to service.
   - Raise and lower the product
   - Lock and unlock the brake/steer pedal in both positions
   - Latch and unlatch the siderails
   - Raise and lower the Fowler backrest
   - Raise and lower the Gatch
   - Make sure all components have proper lubrication
   - Make sure all labels are intact

*Note* - Some cleaning agents are corrosive in nature and may cause damage to the product if you use them improperly. If you do not rinse and dry the product well, a corrosive residue may be left on the surface of the product that could cause premature corrosion of critical components. Failure to follow these cleaning instructions may void your warranty.

Disinfecting the mattress

**WARNING** - Always disinfect the mattress between patients. Failure to do so could result in cross-contamination and infection.

Recommended disinfectants:

- Quaternaries (active ingredient - ammonium chloride) that contain less than 3% glycol ether
- Phenolic disinfectant (active ingredient - o-phenylphenol)
- Chlorinated bleach solution (5.25% bleach diluted 1 part bleach to 100 parts water which equals 520 ppm available chlorine (40 mL of a 5.25% bleach solution per 4000 mL water))
• 70% isopropyl alcohol

Recommended disinfection method:

1. Make sure that the mattress is clean and dry before you apply disinfectants.
2. Wipe down the mattress with a clean, dry cloth to remove any excess liquid or disinfectant.
3. Rinse and dry covers after disinfection.

**Note**

• The mattress cover must be dry before you store or add linens. Failure to remove excess disinfectant could cause degradation of the cover material.
• Some cleaning agents are corrosive in nature and may cause damage to the product if you use them improperly. If you do not rinse and dry the product well, a corrosive residue may be left on the surface of the product that could cause premature corrosion of critical components. Failure to follow these cleaning instructions may void your warranty.
• Frequent or prolonged exposure to higher concentrations of disinfectant solutions may prematurely age the cover fabric.
• The use of accelerated hydrogen peroxides or quaternaries that contain glycol ethers may damage the cover.
Preventive maintenance

Remove product from service before you perform preventive maintenance. Check all items listed during annual preventive maintenance for all Stryker Medical products. You may need to perform preventive maintenance checks more frequently based on your level of product usage. Service only by qualified personnel.

Note - Clean and disinfect the exterior of the mattress before inspection, if applicable.

Inspect the following items:

- All welds
- All fasteners are secure
- Brake mechanism works
- Steer function works
- Siderails raise, lower, and latch
- Casters lock when you apply the brakes
- Casters are secure and swivel
- Casters are free of wax or debris
- Fowler backrest raises, lowers, and latches
- Gatch raises, lowers, and latches
- Skins are not cracked
- Articulating headpiece locks and releases (optional)
- Trendelenburg/Reverse Trendelenburg raises and lowers from all locations
- IV pole is intact and locks in all positions (optional)
- Oxygen bottle holder is intact and opens and closes (optional)
- Arm boards are intact and can be secured
- Arm board support levers are intact and latch
- Accessories and mounting hardware are in good condition
- Body restraints are intact and can be secured (optional)
- No rips or cracks in mattress cover
- No cables are worn or pinched (optional)
- Ground chain is intact
- No leaks at hydraulic connections
- Hydraulic jacks are holding
- Hydraulic drop rate is set
- Hydraulic oil level is sufficient
- Lubricate where required (Lubrication points (page 32))

<table>

Lubrication points

With the Fowler backrest at 0 degrees, apply Syntech grease (3000-200-719) through the slot and hole in the crank screw assembly (Figure 14). Wipe off excess grease.
Figure 14 – Crank screw lubrication
